

PPIAF: Third Quarter FY08 Report
Approved Activities for the period January 1 - March 31, 2008

| Country / Title | Project Description | Approved Funding | Sector | Nature of Activity |
|---|---|------------------|--------------|---------------------------------------|
| I. CORE FUND: Small Activities (Less than USD \$75,000) | | | | |
| 1 AFRICA: Dissemination of Innovative Regulatory Approaches | Disseminating the results of a knowledge building activity undertaken under a previous PPIAF grant: 'Improving Regulation of Water and Sanitation Services'. The activity has produced a body of work (a guide and a rule book) dedicated to enhancing the predictability and quality of regulatory decision-making, entitled: Enhancing Regulatory Certainty: Rules with Greater Specificity for Utility Regulation. | \$ 60,030 | Multi-sector | Capacity Building |
| 2 AFRICA: Poverty and infrastructure services in the slums of Dakar and Nairobi | Prepare a comparative analysis of two unique, large-scale, representative and comparable data sets on 1960 and 1755 slum households surveyed in Dakar and Nairobi. The study will provide a quantitatively-robust and first-of-its-kind baseline on poverty and infrastructure access in slums in the two cities. | \$ 74,175 | Multi-sector | Infrastructure Development Strategies |
| 3 AFRICA: Support to the New Partnership to Africa's Development (NEPAD) Infrastructure Project Preparation Facility (IPPF) | Provide assistance to the NEPAD IPPF in its day-to-day business; assist in the consideration of longer-term strategic issues involved in processing IPPF applications; and prepare an action plan for further assistance. | \$ 42,855 | Multi-sector | Capacity Building |
| 4 BRAZIL: Public Private Partnership (PPP) Contracts for Regional and Irrigation Development. | Prepare an analytical and advisory services for structuring public private partnership (PPP) and/or concession transactions for regional infrastructure (water resources, and related transport and energy) development and operation, with immediate near term focus on legal services. | \$ 75,000 | Multi-sector | Infrastructure Development Strategies |
| 5 CROATIA: Assistance for private sector participation in the Northwest Regional Waste Management Facility (JUSZH) | Provide assistance to JUSZH with international best practice examples in structuring of a private sector participation scheme to develop and implement a regional waste management facility that optimizes waste minimization, carbon reduction potential, and renewable energy generation. | \$ 75,000 | Water | Pioneering Transactions |

| Country / Title | Project Description | Approved Funding | Sector | Nature of Activity |
|--|--|------------------|--------------|--|
| 6 EASTERN EUROPE AND CENTRAL ASIA: South-East Europe Regional Gasification Study (SEE RGS) | This study complements the ongoing PPIAF study on assessing feasibility of developing regional gas infrastructure in the SEE region and aims to analyze the economics of gas storage as a part of developing gas infrastructure and market in SEE. | \$ 47,000 | Energy | Infrastructure Development Strategies |
| 7 EGYPT: Framework for Public Private Partnership (PPP) and Improving Payment Collection in the Power Sector | Develop a framework for PPP in the power sector based on the new law which calls for greater competition, gradual increase in prices and an appropriate risk allocation between the public and private sector participants. | \$ 74,000 | Energy | Policy; Regulatory and Institutional Reforms |
| 8 FEDERAL REPUBLIC OF SERBIA AND MONTENEGRO: Advisory Support to Interagency Working Group for Designing a Reform Strategy for Municipal Public Utility Companies (PUCs) | Assist the interagency working group constituted by the government in formulating a strategy to reform the delivery of essential municipal services (WSS, SWM, district heating, and public transportation), including an assessment of institutional reforms and potential for public-private partnerships. | \$ 74,600 | Multi-sector | Infrastructure Development Strategies |
| 9 GLOBAL: Road Gridline Publication | Prepare a four page gridline that analyzes the key trends and emerging policy issues in private participation in roads in developing countries. This activity will take advantage of the rich information provided by the PPI Projects database on road projects. The review of projects will include the 1990-2006 period but the emphasis will be in the 2001-06 period. | \$ 6,024 | Transport | Emerging Best Practices |
| 10 GLOBAL: Supporting an In-depth Publication on Project Finance for Build Operate and Transfers (BOTs) and Public Private Partnerships (PPPs) | Produce a publication on project finance for BOTs and PPPs to be made specifically available at a discount for people from developing countries via the World Bank publishing office. The publication includes best practices on BOT projects and project finance including issues of greatest interest to developing countries such as risk allocation, mobilizing financing, limited recourse financing, and managing of fiscal risks. | \$ 74,700 | Multi-sector | Emerging Best Practices |

| Country / Title | Project Description | Approved Funding | Sector | Nature of Activity |
|---|--|------------------|--------------|--|
| 11 INDIA: Legal, Policy and Institutional Support for Facilitating Public Private Partnership (PPP) Projects in Bihar | Support to Government of Bihar in facilitating an enabling legal, institutional and regulatory environment for Public Private Partnerships in Infrastructure service provision in the State. | \$ 74,950 | Multi-sector | Policy; Regulatory and Institutional Reforms |
| 12 LATIN AMERICA AND CARIBBEAN: Publication, translation and dissemination of Impact of Private Sector Participation in Infrastructure manuscript | Editing, publishing and disseminating of a book entitled "The Impact of Private Sector Participation in Infrastructure: Lights, Shadows, and the Road Ahead". The book is a systemic evaluation of the impacts of private sector participation in infrastructure in Latin America and their determinants and also assesses the progress achieved in improving and expanding infrastructure services in the region. | \$ 50,000 | Multi-sector | Policy; Regulatory and Institutional Reforms |
| 13 LATIN AMERICA AND CARIBBEAN: Supporting Centre for Indigenous Environmental Resources (CIER) Energy Exchange Study | Conduct the second phase of a strategic, technical, commercial and regulatory analysis regarding the potential for incrementing the energy exchanges between the countries of the Andean countries, Central America and the Southern Cone by both public and private sector agents. | \$ 57,000 | Energy | Infrastructure Development Strategies |
| 14 LIBERIA: Telecom Sector Licensing | The proposed activity directly follows from recently completed work funded by PPIAF which helped develop a taxation policy and licensing fee regime for telecom operators and regulators. This activity will support the regulator with the process of finalizing the license by facilitating consensus building through industry consultations and facilitating regular discussions between the industry and public stakeholders. | \$ 75,000 | Telecoms | Consensus Building |
| 15 NIGERIA: Public Private Partnerships (PPP) in Infrastructure Development | Provide funding and support to facilitate consensus and capacity building in the infrastructure sectors and to develop an action plan to operationalize public-private partnerships in support of key infrastructure development initiatives supported by the government and development partners, including the Department for International Development (DFID) and International Development Association (IDA). | \$ 75,000 | Multi-sector | Capacity Building |

Approved Activities for the period January 1 - March 31, 2008

| Country / Title | Project Description | Approved Funding | Sector | Nature of Activity |
|---|---|------------------|--------------|---------------------------------------|
| 16 PHILIPPINES: Development Forum Infrastructure Workshop | The Philippine Development Forum Sub-Working Group on Infrastructure and the National Competitiveness Council (NCC) are organizing a high level consultative workshop on "Infrastructure Development to Promote Economic Growth through Increased Competitiveness". This activity will help engage a few domestic consultants to work with the Infrastructure Sub-Working Group to facilitate the actual discussions at the workshop, ensuring the quality of those discussions and producing a discussion paper as an output of the workshop. | \$ 8,913 | Multi-sector | Consensus Building |
| 17 SOUTH ASIA: Workshop on Consultations and Strategic Communications in Water and Sanitation Sector in East and South Asia | Workshop to share experience and train select reforming policy makers in the region on the use of effective communication techniques while implementing reforms and infrastructure development through public-private partnership. It is intended that the workshop will equip them with tools to effectively address the concerns of all stakeholders, including the marginalized, and also enhance their capacity to implement reforms that will have a direct impact on the poor either in the form of better services or more effectively targeted subsidies. | \$ 70,360 | Water | Emerging Best Practices |
| 18 TANZANIA: Dar es Salaam Bus Rapid Transit (DART) | Develop a model bid and contract documents for a bus concession and fare collector for the Bus Rapid Transit operations to provide a strategy for their implementation under the Dar es Salaam Bus Rapid Transit (DART). | \$ 74,800 | Transport | Infrastructure Development Strategies |
| II. CORE FUND: Medium and Large Activities (Over USD \$75,000) | | | | |
| 19 AFRICA: Private Investors meeting in Support of Regional Energy Projects in the Southern Africa Region. | Prepare a consensus building workshop on regional power sector investment planning and priorities; an extensive road show for stimulating the interest of private investors and lenders in regional generation and transmission projects in Africa. | \$ 288,600 | Energy | Consensus Building |

| Country / Title | Project Description | Approved Funding | Sector | Nature of Activity |
|--|--|------------------|-----------|--|
| 20 ARMENIA: Feasibility Study for Integrated Solid Waste Management Plan through Public Private Partnerships (PPPs) in Yerevan City | Preparation of a feasibility study for developing an integrated solid waste management system for the city of Yerevan that incorporates private sector participation. | \$ 531,500 | Water | Infrastructure Development Strategies |
| 21 GLOBAL: Toolkit on Resource Allocation and Utilization in the Transport Sector | Develop a toolkit on resource allocation and utilization in the transport sector, including road, rail, maritime and aviation transport. The activities aim at increasing and improving the understanding of public and private expenditure related issues within the transport sector; and systemically developing an instrument that will assist task teams and partner countries in increasing efficiencies of resource allocation and utilization in the transport sector. | \$ 385,400 | Transport | Emerging Best Practices |
| 22 KOSOVO: Establishing regulatory framework for developing renewable energy sources | Assist the Energy Regulatory Office (ERO) to develop secondary legislation and regulations for the development of Renewable Energy Sources (RES). | \$ 202,500 | Energy | Policy; Regulatory and Institutional Reforms |
| 23 MACEDONIA: Assisting Transmission System Operator and the Energy Regulatory to Operate in the Competitive Electricity Market Regime | Provide assistance to Macedonian Energy Regulatory Commission for developing new tariffs for the next control period and capacity building support for implementing its role and responsibilities during the ongoing market reforms and introduction of competition. | \$ 605,767 | Energy | Policy; Regulatory and Institutional Reforms |
| 24 MAURITANIA: Electricity Sector Reform | Assist SOMELEC in restoring its financial, technical and operational viability and identify options of sector reform measures that would lead to an enhanced private sector involvement in the power sector. | \$ 305,000 | Energy | Policy; Regulatory and Institutional Reforms |

PPIAF: Third Quarter FY08 Report
Approved Activities for the period January 1 - March 31, 2008

| Country / Title | Project Description | Approved Funding | Sector | Nature of Activity |
|--|--|------------------|--------------|---------------------------------------|
| 25 SOUTH AFRICA: Public Private Partnership (PPP) Implementation Unit for the Sedibeng District Municipality (SDM) | Assist SDM with the establishment of a PPP capacity building programme to strengthen the compliance and execution of the municipal PPP guidelines and methodology for the delivery of infrastructure and municipal services, including in local economic development, transportation, property development, energy efficiency and solid waste management. | \$ 250,000 | Multi-sector | Capacity Building |
| 26 UKRAINE: Review, Analyze, and Recommend Public Private Partnership (PPP) Investment Models for Euro 2012 projects | Assist the Government of Ukraine to strategize on how best to attract private investments for Euro 2012 infrastructure projects and in particular, provide detailed financial analysis and guidance for attracting private investment in the modernization of regional airports. | \$ 237,000 | Multi-sector | Infrastructure Development Strategies |
| III. (A) NON-CORE FUNDS (Small, Medium and Large Activities): JAPAN | | | | |
| 27 MONGOLIA: Integrated South Gobi Infrastructure Development Strategy | Mongolia is poised for a major boom, driven by the mining sector. Exploration has led to the discovery of the impressive pipeline of world-class mineral projects in the province of South Gobi which requires adequate provision of water resources and infrastructure services, and ensure appropriate assessment and management of environmental risks. The proposed activity will help the Government identify infrastructure development options, including the financial, environmental, and social implications of the development of the towns likely to be affected by these mines. | \$ 700,000 | Multi-sector | Infrastructure Development Strategies |
